The many letters of praise that Simply Beautiful Spaces, LLC receives from customers is pretty telling about what these professionals can do for those who desire more beautiful, comfortable, functional living spaces. "I can't believe it is our house. It looks like a model home! Your vision took me places I could never imagine." "You certainly make a humble space look spectacular!" "As for our living room, we sat in it for the first time this weekend and had coffee with a friend."

The list goes on and underscores what others can expect from this professional design team. "Our main priority is to create unique, beautiful environments that are truly inspired by the clients' own dreams, that work with their tastes and style, and that fit within their budget," notes owner Kathryn Koch, certified in specialized Interior Design, Redesign, and Home Staging.

Simply Beautiful Spaces' portfolio includes everything from new and first homes to vacation homes to commercial and office spaces of every kind. Kate has a real talent for incorporating existing treasures into new designs; and for new purchases, offers clients an exciting array of

**For this design, we brought in new bedding and furniture, outfitted the room with a ventless fireplace, created a cozy sitting area and brought in new lighting, artwork and accessories to turn this bedroom into a beautiful and romantic master retreat.**

competitively priced decor items, bedding, art, and lighting options through her online store. For projects that require more substantial purchases, such as furnishings, Kate takes to the road to find clients great deals on unique products. No matter what the project, even preparing homes for sale by creating spaces that will please the buyer's eye, the end result is always outstanding.

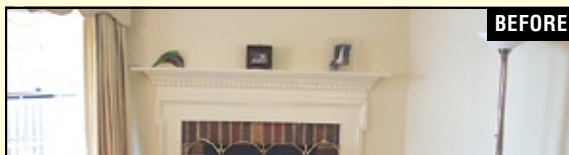

From color and furniture placement consultations and window treatment advice to accessories, lighting, furniture, and textile selections, Simply Beautiful Spaces can open your door to the great feeling that comes when the perfect balance of form, beauty, and function is achieved.
